About Me

I am an analytical and self-driven individual who thrives on solving complex mathematical and physics problems. Starting with limited resources, built entirely on a single laptop. I taught myself embedded systems, ESP32 microcontrollers, and web development. I view fast changing technology not as a barrier, but as an exciting space to innovate.

Mohammad Asyam Wicaksono

Educations

- ★ Al-Azhar SB Jakarta Senior High School 2026 - Now
- ★ Al-Irsyad Purwokerto Junior High School 2021-2024

Experiences

- Hardware & IoT: ESP32 Microcontroller, Sensor Integration, Embedded Systems, Basic Circuit Analysis.
- Software & Web Development: HTML/CSS, JavaScript/Python (Core Programming & System Logic).
- Methods & Tools: Debugging, Hardware/Software Troubleshooting, Technical Documentation Search.
